

Creating Mid-Revenue Cycle Capacity

Challenge

Streamline medical coding productivity to create operational capacity for business growth without adding overhead.

Specialty

Ambulatory Surgical Centers

Client

Large ASC RCM Technology and Services Provider

Solution

Gemini AutoCode w/AI-Powered Decision Support

Outcomes

- Medical Coder Time at Task Reduced by 50% with Decision Support.
- AI-Powered Gemini AutoCode scaled across multiple specialties and complexities to impact 56% of all claims in first nine months of production.
- Mid Revenue Cycle Capacity Creation greater than 35%.

Overview

Aideo developed and launched an ASC facility-based autonomous coding engine in November of 2022. Partnering with a large ASC RCM vendor, the AI-driven Gemini AutoCode solution scaled across multiple medical specialties and claim complexities to impact 56% of all claims with either straight-to-bill or decision support.

When delivering decision support, Gemini AutoCode cut the time at task for medical coders by an average of 50% resulting in a total team capacity enhancement of more than 35%.
